## Hamaiian Gazette. HON, A. SE

Arrives Yesterday by America Maru.

Father of U. S. Special Agent-Views on American Politics and Policy in Pacific.

Hon, Arthur Sewall of Bath, Me. who was the candidate for vice-president of the United States on the Bryan ticket three years ago, was among the passengers arriving on the steamer America Maru yesterday from San Francisco. He will visit his son, Harold Sewall, in Honolulu a few weeks before continuing his voyage to Hongkong and Manila, and expects to make a brief stop in this city on his way home a few months hence.

Unlike Mr. Bryan, Mr. Sewall is something of an expansionist. At any rate, chatting with a representative of he Advertiser, Mr. Sewall said: "No, differ from Mr. Bryan regarding our territorial acquisitions. Now that we have taken them I am heartily in favor of holding them and making the most of them. Give them a uniform government, say like that of four territories in the United States. I do not know just what Senator Cullom proposes but a territorial form of government would no doubt be most satisfactory, and I believe it will be adopted before long. It is not wise to place obstacles in the way of the administration's efforts to settle this question of placing our new colonies on a sound foundation. This is an age of progress, and we should take advantage of it.

"Annexation has of course been a good thing for Hawaii, the islands having probably doubled in value since coming under our jurisdiction. The Islands will continue to increase in importance, too, and Honolulu is bound Modder River refers to an exchange to become a great scaport and in all of shots between the Boers and General respects a much finer city than it is Methuen's outposts. The Boers still at present. The Philippines, Porto hold their position at Magersfontein. Rico and Cuba will also grow in im- The town of Jacobsdal is also in their portance and wealth. Cuba, like the others, will naturally become ours and should be given territorial govern-

"I believe the heads of the Republican and Democratic tickets will be the same as before. McKinley will be nominated, and it appears to be pretty well understood that Mr. Root, secretary of war, will be the candidate for the vice-presidency. Will I accept a place with Mr. Bryan? Well, I am not a candidate. I do not think, furthermore, that it would be good policy to have a candidate from a section of the country where the party cannot expect an electoral vote. But the Democratic party is deserving of my best efforts, and I should probably not de

cline a nomination. "But as for the issues of Democratic party in the last campaign, the counwarrant the expectation that they would win in the next contest. The entire country, from one end to the other, is extremely prosperous. Money is plentiful, and while times are so good people will not strive to have proposed reforms adopted. The issues may be brought forward when conditions change again for the worse, but there is no hope of their adoption under the present situation.'

Commenting upon the territorial ac quisitions of the United States Mr. Sewall said: "What the United States should be considering is the partitioning of China, with a view of securing her share of territory which is before long to be divided among the nations." He appears to have a full realization of the tremendous future growth of American commerce in the Pacific.

## Hiring German Troops

BERLIN, Dec. 20.-Despite repeated British denials, it seems to be a fact that British agents are busy in many of the rural districts in Germany hiring veterans for service in South Africa. Several well-authenticated cases have been reported this week, but the following incident seems conclusive. The District Court of Hamburg has just issued an order for the arrest of a the day from throughout the country British agent named York for hiring came offers of service from 100,000 of a humber of German peasants in the yeomanry and volunteers, all prepared neighborhood for military service, to equip themselves under the terms which, under the imperial laws, is a criminal offense.

There is nothing, however, to interfere with Herr Krupp in the manufacture of steel shells for the British army. A local paper announces that 25.ers from the other Islands fath- 000 shells are being made on a "rush" order and that the men are working night and day.

## Fall of Ladysmith Predicted.

VIENNA, Dec. 16.-General Buller's reverse was the subject of almost universal comment in the Austrian press ioday. Most of the papers incline to the assumption that General Buller's military motives in hurrying engagements are found in the situation at Ladysmith, and they conclude that capitulation of that place shortly may be expected. The Neue Freis Presse says: 'If the

been the excitement prevailing among its populace on African soil. EER is used in the Stamps made by the Afrikanders and the state of public opinien in England."

# FLAMING HIGH

## Great Reenforcements Will Go to South Africa.

## LORDS ROBERTS AND KITCHENER ORDERED TO THE FRONT

Major General Lawton Killed in the Philippines Other Telegraphic News of Special Interest.

LONDON, Dec. 21.—Omingus silence | fanned by all public speakers and continues regarding Generals Buller newspapers. and Methuen. Some interesting details of the battle of Colenso have been received to the effect that the fight was a drawn battle and that British troops are keeping an eye on the abandoned guns, while one telegram records their recovery by a party of volunteers. But there was no confirmation of these reports. The names of 137 non-commissioned officers and men who were killed have been forwarded instead of 117 as at first reported.

There was no fresh news from General Gatacre. General French has another encounter with the Boers on Tuesday,

when the New Zealanders distinguished themselves under a heavy fire. The latest dispatch of Saturday from

hands. But little credence is placed in the report that the guns lost by the British were not captured by the Boers. Had the story been true General Buller must have referred to it. Buller's artillery cannot now muster much more than thirty guns, while the captured British weapons have no doubt been mounted in the Boer lines and can be ammunition seem to have been lost with them.

## Anxiety in Pall Mall.

Remarkable, indeed, were the scenes n Pali Mail yesterday. Of late at the War Office we have grown accustomed to see ladies in magnificent tollets, wives, mothers and sisters of officers at the front, and modestly clad relations of soldiers elbowing each other all with the same enxiety depicted in their faces and the same heaviness o try is in too prosperous a condition to heart. It was in the center hall and outside in the streets that the scene yesterday was quite new. Instead of the usual war news seekers bands of stalwart, athletic, big-boned young men were assembled. They were of a build which showed them to be of a race accustomed to live an out-door life. They had healthy-looking color in their cheeks. All of them were well dressed, most of them affecting a jaunty colored waistcoat, sporting hunting rayat, leather gatters and boots which looked more like those made for a day's shooting than those which are generally seen in swell Pall Mall. They came in crowds; they were eager, talked much and kept darting in and out of the doors and passages of the War Lifice. Many of them saluted Lord Chesham and Lord Lonsdale, who the regular army are now in process each remained for a considerable pe-

All of these able-bodied, sportsmanlike youths differed from the usual crowd, inasmuch as they were not there with the usual question, "What news?" nor were their faces anxious. Their expression was eager. What they wanted to find out, what they were there for, was to know how they could get to the war—how they could be embodied in England's citizen army of trregular troops.

## Volunteers Eager.

According to the War Office during broad latitude of the rule as to clothing, which really only restricts them to neutral colors, so as not to be too conspicuous targets for Boer sharpshooters. Further offers of voluntary which probably will number 80,000, service were coming in so fast yester day afternoon that it was impossible to attend to them. They came by post, by telegraph wire and cables from the east and the west, Australia, Canada, Malta and the Cape, and from almost every region where the British colonies flourish.

Everywhere the war fever is visible. beople thought the war fever was great when was was declared, but it was nothing to what on every side is witnessed today, and what was most remarkable is that women are just as keen as men. Almost every woman, he she a star in society or on the stage. tells you with deep yearning that she wants to be a nurse. If then and women were to be allowed to have their

## Section D Again.

recalled to the colors is significant of the strain which the present situation has imposed upon the resources Fort. of the regular army. The whole army reserve consists of four classes of sections, A. B. C and D.

Section A is a small reserve of 5000 have completed their color service and are working out in the reserve the remainder of their engagement. Section C comprises men who for various reasons have been transferred to the reserve before completing the normal period of service with the colors.

Section D is a supplemental reserve consisting of men who on completion of their first period of engagement are enlisted to serve for a further period of four years in reserve, and are not liable to be called out until after the rest of the reserves.

The calling up of Section D is thereare or very shortly will be used up: " The total strength of the reserves, according to latest returns, was 82,005

men. The army in South Africa will in the immediate future, according to mortem held by Dr. Kobayashi, assistthe Wer Office plans, be increased fully 50 per cent. Three full divisions of of arrival at the Cape, on their way thither or under sailing orders. Large drafts to bring regiments already at the front up to full war strength to replace the wastage caused by casuaities are being sent out.

The great force of volunteers and yeomanry which is to be organized will still further swell the number. The total of reinforcements already arranked for follows: Volunteers, 7000; reomanry, 2000; fifth division, 11,000 (about 6000 already landed at the Cape); eixth division, 11,000; seventh division, 11,000; cavairy brigade, 1200; reinforcing drafts, 12,000; Canadians and Australians, 2000. Total, 58,200. Deducting casualties, these reinforcements will bring the British forces in South Africa to 130,000, not introops of Cape Colony and Natal,

The action of the city of London, through the Lord Mayor and Corporacost of equipment of 1000 city volunteers, entailing an expenditure of about in England at present. From all sec- ily. tions come enthusiastic replies to the call for volunteers.

Chinese and a Native Succumb.

Ouarantine Patrol Quietly Effected--Householders Minus Servants--A Suspect.

DEATHS YESTERDAY.

Maunakina, native boy, at Kewalo, 4 a. m., Dec. 28; postmortem examination revealed plague symptoms and body was cremated as a plague vic-

Chinese, who was brought to Health Office December 27th at night and sent to Kakaako hospital; died early yesterday morning; postmortem examination by Drs. Kobayashi and Mori showed death resulted from bubonic plague.

Yesterday morning the denizens of the Chinatown district awoke to find that it can get all the men and horses the Chinatown district awoke to find it wants. Lord Wolseley, who has quarantine. The military lines estabbeen openly severely attacked, has completely changed his views, and is now for all the cavalry that can be troops of the First Regiment at 3 a. m. quarantine. The military lines estaband by 7 o'clock the entire available those taken, while the manufacture of formed of the facts regarding the Chillyddite shalls is being rushed to its ness who died at the entrance to the utmost castair. At the army clothing depot the star man who had neen captured that the chinese hearty doubled and works making an attempt to escape from Chinese has been hearty doubled and works matown, he decided that the Chinese had broken their promise to aid the Board of Health, and declared the quarantine should again be placed upon the infected district.

Colonel Jones was telephoned for and Minister Cooper acquainted him with his resolution. Inside of an hour and mous number of presents to be sent a half a sufficient number of the regiout to South Africa for officers and ment had assembled; orders were issued for the posting of sentinels, and But altogether from today on we detachments were sent to different might east imagine that England parts of Chinatown to surround it aim had commenced a new war, much large ultransously. At 2.30-a, m. and be-Colonel Jones is extremely gratified at the ready compliance of the men. The announcement that the men of Chaplain Lane and many of the yards Section D of the army reserve the to and alleyways behind the Walkiki side of Nunanu street were also guarded to prevent an exodus through the block between Beretania and Hotel streets to

As in the previous quarantine, house servants and help were caught in the meshes and only a few were able to produce passes early in the day to remen. Section B consists of men who turn to their working-places. At an early hour residents appeared at the Health Office to apply for passes to bring their servants out of the infected district. In all cases Minister Cooper required that new clothing for each servant be sent to the fumigating station and the old clothing left behind. Each servant was subjected to a thorough fumigation by Dr. Pratt and his increased corps of assistants and inspectors.

Early in the morning the Chinese who was caught at the corner of King and River streets on Tuesday night while making an attempt to escape, fore an indication that other sections died, and was pronounced, upon diagnosis, as a bubonic plague victim-the eighth since the plague made its appearance. The body was brought up from the Kakaako hospital, and a posted by Dr. Mori. The same swollen inguinal gland was found, but there was none of the bloody serum in the abdominal cavity found as in the previous cases. From this clinical diagnosis it was stated he had died of the plague.

Maunakina, the native boy who died in Kewalo before daybreak, was also given out that the case was suspicious. subjected to a postmortem examination and pronounced a plague victim. the inguinal gland being swollen, Microscopic slides showed the presence of bacilli. Maunakina is the ninth

During the forenoon a report came in to the Health Office that a Chinese

A Portuguese, who dropped dead on Punchbowl street was also visited, but there was nothing in the circumstances of his death to pronounce it "suspi-LONDON, Dec. 21, 4:45 a. m .- The clous," and a burial permit was given, gravity of the military situation is assigning the cause of death to heart

> . The 94-year-old Chinaman who was ers sick reported by the Japanese phy- of power by England."

sicians were visited, most of them suffering from colds and fevers. The Japanese patient at Kakaako hospital was getting along in splendid shape yesterday, and seems to be on the road to recovery. The swollen gland had been removed by Dr. Kobayashi,

which relieved the man greatly. Said Minister Cooper last night: "Both from the sanitary and personal inspection standpoints, I think we have got the situation well in hand. Dr. Pratt has strengthened his corps of inspectors, and Judge Carter has secured able assistants for carrying out the inspection of his district. Inspectors have now been appointed from Wailuke to Kalihi, including Manoa, Pauos and Nuuanu valleys. The main thing to secure is recognition from the Chinese of their willingness to comply with the requirements of the Board.

"All the deaths that have occurred around in different parts of the city have been traced back directly to the quarantined district, with the one exception of Ethel Johnson."

Several of the guards in the military cordon misinterpreted their orders in regard to allowing persons to pass-through the lines. One of the Board of Health hacks with a health physician passed the guards many times with a pass only for himself and not including a driver. At one point the hack was stopped, the officer in charge saying his orders were so strict that he would not allow the back to pas through unless a pass were produced for him. As the physician was at that particular time on an important mission the stoppage was exasperate ing, and in driving to and fro from the guard station to the Health Office a valuable part of an hour was lost. The officer, when reminded that some of his own guards who also had the same "strict orders" had failed to stop the carriage, stated they "were an ignorant lot of fellows, anyway." Colonel Jones' attention was drawn to the anomalous interpretation of orders, and he sent out new fronclad instructions to allow no one without a pass the privilege of entering the lines. Both the Japanese and Chinese offi-

cials yesterday appointed a corps of inspectors from among the better classes, who will assist Dr. Pratt in ferreting out cases of sickness and pestholes. Minister Cooper, Armstrong Smith, Jack McVeigh and the entire corps of

agents and inspectors on duty at the Health headquarters had a busy day and none have had much sleep since Wednesday up to last night. Crowds of people seeking passes, carrying freight bills for cancellation, and people looking for all kinds of informs iton, invaded the officer. For the comfort of the Minister and amistant a small temporary frame structure is being built on the lawn on the Walkiki side of the Judiciary building, to be used as a dining-room and kitchen. The fumigating house there is also in the finishing stages and can be used in a

The Board of Health held a meeting last evening at which were present, President Cooper, Dr. Day, Dr. Wood, and Mr. Geo. W. Smith. Considerable discussion was had as to future work in connection with health and quarantine matters. The main question of the meeting, however, was the passing of a resolution which makes it a misdemeanor for anyone to neglect to give information of sickness, or to refuse to give information which would result in the finding of sickness, or to obstruct a health officer or agent in the performance of his duty. The penalty for misdemeanor of this iknd is al-

ready set forth in the penal laws. The passing of this resolution is a direct result of the concealment of so many cases of sickness among the Chinese of late, and the Board found it an absolute necessity to make it a penal offense for attempting to hide patients from the Health officers.

A Japanese woman died last night on Smith street between Beretanis and Pauahi streets. Yesterday morning she was visited by a health physician and she was then able to sit up on her bed. Her temperature then registered 103. When her death was reported two health officers went to the house to make an examination of the body. What may have been their opinion as to the direct cause of her death was reserved until communication could be had with the Japanese physician who was attending the case. No news was

rights are asked for the Uitlanders than they enjoyed before the war, and also Great Britain pays the war expenses incurred by the Boers. If Great Britain continues the war, the dispatch says, President Krueger and Styn will ask the Cape Dutch to proclaim the independence of Cape Colony.

### GEN. LAWTON DEAD.

One of the results of the coal famine Falls Like a Hero at the Head of His Men.

MANILA, Dec. 20.-The circumstances surrounding the heroic death

show the nobility of his character.

When Captain Ethelbert L. D.

Breckenridge was shot General Lawton assisted in taking the young officer to a small depression, which, it was thought, offered sufficient protection.

Bullets rained about the tall form of General Lawton as he exposed himself above the embankment. Officers about him called the General's attention to men by the Government for equipment, the fact that Filipino sharpshooters were alming at him. They begged him to be careful. General Lawton resolutely replied: "I must see what is going on in the firing line." He then started off and had traversed about fifty feet, when he met his aids. King and Fuller, returning. As they approached him General Lawton suddenly paled

### MARCONIS COHERER.

Wireless Telegraphy Improved at American Hands

PITTSBURG, Pa., Dec. 17.—Bold researches by Professor Reginald Fessenden and his assistant, Professor Kitner, in the electrical laboratory of the Western University of Pennsylvania, have resulted in the production of a receiver for wireless telegraphy that is 2,000 times more sensitive than the so-called "coherer" of the Marconi sys-

In speaking of the discovery today Professor Fessenden said: "Although we have improved the receiver so that it is 2,000 times as sensitive as the original one, we realize that we have not yet begun to see the limit. Marconi, in his brilliant experiments, has demonstrated that messages can be sent over ninety miles. As our receiver is several hundred times more sensitive, it is clear that the messages can be sent by our method very much farther, though just what the limit is I would not like to say. It at least should be possible to send messages across the Atlantic with poles less than 200 feet high. The ultimate distance must be checked by actual experiment before it becomes a scientific fact in the strictest sense."

### NO ALLIANCE WITH RUSSIA.

Spain Will Not Cede Her African Possessions.

MADRID, Dec. 17 .-- Senor Silvela, the Premier, replying to a question on the subject in the Chamber of Depu-ties yesterday, said the report of an alliance between Spain and Russia based on the cession of Ceuta, the Spanish seaport town in Morocco, opposite Gibraltar, was without founda-

"Neither now nor in the future," he declared, "will Spain on any account cede her African possessions."

## NAVAL REPOR

## The Olympia's Surgeon on Plague.

Bubonic Deaths Not Constant in Occurrence and Number Shown by Official Figures.

The appended report of A. F. Price, from the date of its signing, which is U. S. Naval Medical Inspector, written the seventh of November last, or earlier if possible. from the U.S. Flagship Olympia is noteworthy as it bears directly upon the plague at present in Honolulu. People are prone to believe that the He is Fleeing Through Bontoc With plague, when once it gains a foothold in a community, will sweep off the inhabitants by hundreds. So deeply is Peyton C. March of the Thirty-third the opinion settled in their minds that they are loth to believe that the cases Aguinaldo and has reached Bagnen, in of death reported so far in Honolulu the heart of the Grand Cordillera, are bubonic, merely because so many days intervened between the first and recent deaths. The Medical Inspector's impossible. report mentioned was incorporated in the annual report of the Surgeon-General of the U.S. Navy to the Secretary of the Navy, 1899, and the report is as

"Plague:-The bubonic plague was present at Hongkong when the ship arrived there February 17-4, and the number of cases was increasing daily in spite of the isolation of the sick and energetic disinfection of houses from Cervantes to Bagnen, so he reand personal effects. The record was as follows: January 8, two cases; January 15, no case; January 22, two cases; January 29, two cas s; February 5, five cases; February 12, five cases; February 19, nine cases; February 26, forty-seven cases; March 5, twenty-two cases; March 12, sixteen cases; March 19, thirty cases; March 20, for ty-two cases; April 2, forty-two cases; April 9, one hundred and six cases April 16, ninety-seven cases; April 23 one hundred and twenty-seven cases It appears that during May and June the epidemic reached its highest point, about forty cases daily. Quite a number of fatal cases occurred among non-Asiatics. The disease is extremely fatal in the Chinese, the mortality being from eighty-five to ninety-five per

cent.
"It is thought that the rate of mortality is somewhat lower in Europeans. There was a severe epidemic of this disease at Hongkong in 1894, and a more serious one in 1896. The disease in each of those years was comparatively limited in extent until April or May, when it assumed an epidemic form and lasted until about the end of June.

they have suffered in consequence of the unwarranted military action, if this oe shown to have occurred, on the part of the American, German or British officers, between the 1st of January last and the arrival of the joint commission in Samoa, shall be decided by arbitration in conformity with the principles of international law cr con-

siderations of equity." There is also a provision to the effect that "either of the three Governments, named with the consent of the others, previously obtained in every case, submit to the King for arbitration similar claims of persons not being natives who are under the protection of that Government and who are not included in the above-mentioned categories."

The agreement provides for the exchange of ratifications four months

### AGUINALDO A FUGITIVE.

Two Soldiers.

MANILA, Dec. 16, 9:15 a. m.—Major Infantry has abandoned his pursuit of where the range is 10,000 feet high and where food is scarce and travel almost

From native couriers and Spanish prisoners it was learned that Aguinaldo left Bontoc, in the province of the same name, with three women and two soldiers, three days ago and headed southward, evidently for Bayombong, in the province of New Vizcaya, where to the Minister of Foreign Affairs and it is thought he may encounter the

Americans. Major March's command was depleted 20 per cent by the two days' march turned to Cervantes on December 10.

Scattered bands of Macabebes, which have been operating in the north, are being collected with the intention of sending them back to Manila, as there is much sickness among them and they are unfit for further mountain work.

Lieut. Chadwick and a correspondent of the Associated Press, the former commanding thirty Macabebes, have visited the mountain town of Pamposand, received the surrender of a company of insurgents, including three officers, with their arms and ammunition.

General Concepcion and other Filipino officers, who have surrendered, have been taken to Vigan. Concepcion, who is cheerful, insists that the insurgent organization will be maintained even in the districts where the Americans are operating, claiming that the Filipinos can use their troops whenever they desire. He suggests that the only method of terminating the war is the capture of Aguinaldo and the obtaining of an order from him for the troops to surrender their arms. But Concepcion believes Aguinaldo will never be captured.

There May Be Another a case of sickness occurs among you, don't conceal it, but let the Board know Victim.

A Suspicious Case in the Hospital-The Board of Health Has a Conference.

(From Wednesday's Daily.)

Honolulu, Dec. 26, 1899. "I am under the necessity of informing you that since my report of December 22d three cases of death from bubonic plague have been reported to the Board of Health: That of Ethel Johnson at Iwilei on December 23d; that of Ah Fong at Palama on December 24th; and that of Chong Mon Dow at Pawas on December 25th.

"Very respectfully,
"HENRY E. COOPER, "President Board of Health."

The above are the contents of a leter which President Cooper addressed to all the foreign Consuls in Honolulu vesterday after 100n. Dr. Carmichael embodied the letter in his official reports to San Francisco and Washington, in which he declared Honolulu an infected port. Consul General Haywood also notified the State Department at Washington.

From now on until the quarantine is again raised the shipping will be carefully watched by the United States authorities, and vessels cannot clear with a clean bill of health. The Aus-tralia, which left for San Francisco yesterday, carried clearance papers which will place her in quarantine at her destination. Pursuant to the orders of the Health Board, all the Island steamers yesterday moved away from the wharves to anchorage and passengers and freight were lightered out to them after a careful inspection.

One or two cases of death were investigated by the Health Department yesterday. One of these was a Spaniard from Punchbowl street near Queen. An autopsy revealed the fact that the man died of brain trouble and had no symptoms of the plague.

Another case was reported by the agents of the Board of Health, this time a Chinaman 94 years old, who was smuggled out of Chinatown and sent to the Chinese hospital at Palama. Agent Johnson of the Board got wind of the removal and accompanied Dr. Scaparone to investigate the patient's illness. Dr. Li, a Chinese physician, also went out and made a careful examination of the old man's condition. Li also expressed a similar opinion. basing his statement on cases he has observed in Hongkong. This is another case which has baffled the previous search of the inspectors for sickness in

This state of affairs, where sick Chinese were carefully concealed in Chinatown and then smuggled to some outlying district, as in the case of the Chinese who died yesterday at Pawaa, led President Cooper to ask the Chinese Consul, Vice Consul and representative The verdict of the coroner's jury in Chinese merchants of the city to have a conference with him at 2:30 yesterthe two officials and about a score of Chinese merchants came to the Board of Health office to listen to President Cooper. Wm. Crawford acted as inter-

It was an important meeting in that many of the Chinese have lately become exasperated at the condition of affairs under quarantine restrictions, little thinking that in some instances their own action in concealing the sick has been responsible, and they have also stated that the Board of Health had discriminated against the Chinese in the matter of cremations and autopsies as against the Japanese, and evidently have been greatly wrought up

President Cooper's Statement. President Cooper, speaking through | PRECAUTIONS AGAINST an interpreter, said to the Chinese

"I called this meeting for the purpose of devising ways by which we can 🖈 assist each other at this time. The quarantine will be a very great inconvenience to every one, but the Board will assist in every way to make it as light as possible. I want you gentlemen to exercise your influence over

your countrymen so there will be no more friction between the Board of Health and those of your people who | happen to be put to any trouble. "It has come to my notice that there are certain Chinese who have posted notices around town derogatory to the

Chinese Consul and Vice Consul, holding them responsible for the conditions which the quarantine brought upon Health that we are making discrimi- +

nations against the Chinese in favor of | the Japanese. That is not so. There have been no cases of plague amongs: of your countrymen

All claims put forward by American ers. Price 50 cents. Mailed by the discriminate against the Chinese That ,\* citizens or German or British subjects Hollister Drug Co., Lid, agents for the is not so. It is unfortunate that the disease has appeared almost entirely \* Honolulu, December 26, 1899

Above all things, I want you to as-

sist the Board in keeping peace and quiet among your countrymen, and the more readily you and they conform to our requirements, the more quickly the plague will be stamped out; but if sickness is concealed, as it has been, I don't know what will happen. When about it at once. If you don't do this there is no telling how long the plague and quarantine will be continued. It is very important that you advise your countrymen to inform us of all cases of sickness, and we will immediately send a physician to see about them.

Consul: "I desire to ask if the Board of Health will not first notify me if a case happens to be plague be-fore cremating the body. We will then be satisfied with your action."

President Cooper: "Yes, sir, and we have also arranged now so that the ashes of the dead will be preserved and put in an urn so that the friends can keep them. We will notify the

Consul in each case."

Consul: "I would like to ask if any case happens in a store if just that place alone cannot be quarantined and not the whole district.

President Cooper: "We can do that in case there is not a general outbreak. If only a single case, we can quarantine only the one building or place." As a result of the conference, in

which the question of a suitable place for fumigating freight was discussed at considerable length, an understanding was reached by which the Consular representatives and merchants present agreed to assist the Board.

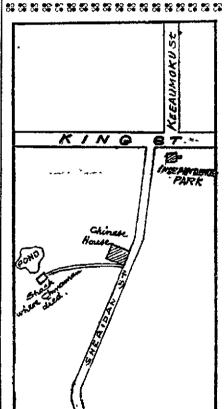

Some of the merchants requested of President Cooper the ashes of the Chinese bookkeeper who was cremated by the Board. President Cooper stated that as the body was cremated in the foundry the ashes were not preserved.

Inspection and Quarantine.

Judge A. W. Carter has been appointed to organize a corps of inspectors and supervise them in making a thorough inspection of every Chinese and Japanese house between Waikiki and Kalihi The force will be composed largely of volunteers and Judge Carter will personally see to it that no dwelling is missed or cases of sickness missed.

The military guards were with drawn yesterday afternoon and dismissed from further duty, their places being supplied by men who will be di rectly under the orders of the Board These men will be provided with police clubs, and in no instance are they to allow anyone to pass in or out of the places quarantined.

The Chinaman who died at Pawaa Monday was found in a shack off Sheridan street below Independence Park,

Place where Chinaman died in Pawaa on Monday.

as shown in the sketch. The house directly on the road contained over a score of Chinese, and the sick man, after lying in the house among them for several days was afterwards carried to the shack in the rear, near the pond, for concealment. The Chinese around the place are very belligerent, and a strong guard has been placed

there. The Board of Health is about to issue a circular printed in English, Hawalian, Portuguese, Japanese and Chinese cautioning the people against possible chances of infection, which will be as follows:

BUBONIC PLAGUE

Plague germs flourish in filth, in garbage and in damp, dark or \* foul places. Sunlight and pure \* air are destroyers of plague germs.

Keep clean, wash the hands often, and bathe frequently. All cuts and scratches should be covered, preferably with adhesive plaster.

Eat fresh and well-cooked

All cases reported here since the plague appeared, with one \* exception, developed inguinal \* buboes, logically pointing to infection from the lower extremities. The victims were also persons accustomed to go barefoot.

It is the opinion of Dr. Kltasato, the celebrated plague specialist, that where the inguinal riands were affected the infection came from the feet. Therefore, do not go hare-foot; it is dangerous to go bare-foot in \* times like this; wear shoes

Destroy rats and other ver- \* min. Medical experis agree that \* # principal source of danger. Deplague will become less

Office of the Board of Health, \*

## Strong Bones

In speaking about Scott's Emulsion for children, you should not forget that it contains lime and soda, just what the child must have to form strong bones and good teeth. It's this forming time you want to look after.

Growing bodies must have an easily digested fat. Just think how much of it there is in milk, as cream.

## Scott's Emulsion

is even more easily digested than cream. It's surprising how children thrive when given it.

Don't keep the children living on the edge of sickness all the time. Make them strong and rugged, plump and hearty. Scott's Emulsion of Cod-liver Oil and the Hypophosphites of Lime and Soda will do this for them.

At all druggists; soc, and \$1 00 SCOTT & BOWNE, Chemists, New York.

President Cooper said last night with reference to the Chinaman who was at first reported to have come across the Pali from Kaneohe: "I am pretty well satisfied that the Chinaman did not come from Kaneohe. We have traced him back to Chinatown, but are not quite sure of his location there. There will, consequently, be no quarantine guard placed at the Pali, unless a general outbreak occurs, in which case a strong guard will be stationed there.

Deputy Marshal Chillingworth said: The man who died at Pawaa, came from Hong Chong's store between Kekaulike and River streets since the quarantine was raised. The Chinaman who died at Palama did not come from Kaneohe, and has not been there for two years. This is the result of my investigation begun last night."

At the Board of Health meeting Monday night, it was decided by the Board to offer a bounty of ten cents a head for rats from any part of Honolulu. This action of the Board was 🛨 brought about by the statements of the medical members, that rats carried the plague infection from ships to the shore, and that it would be a wise plan to kill off all the rats in Honolulu as soon as possible.

The following inspector's report, showing the ownership of much of the property in his block, shows the presence of inaccessible interiors of blocks which will prevent it from becoming thoroughly cleansed unless radical changes are made in the entire block

As inspector for Block "19" between Fort and Nunanu street, Chaplain Lane and Hotel street, I have the honor to make the following report:

Naturally Nuuanu street presented the chief problem. The sanitary condition of these houses (occupied by Chinese and Japanese—chiefly Chin ese) is bad, though probably not as had as in many other districts.

The houses are very old, and from Chaplain Lane to the brick buildings owned by the McLean Estate (with the exception of the corner occupied by Ah Lo) are rickety and unsafe, hadly lighted and crowded. The worst are the makai portions of the Silveira property-that owned by J. W. Austin, and property owned by Messrs. Gear and Harrison.

The cesspools are entirely inaccessible, and although in most cases not running over, are malodorous beyond remedy, and there is no available space to dig fresh cesspools.

Fortunately the remedy is easy and natural. The widening of Nuuanu street condemns every one of the ob jectionable buildings, and with the enforcement of sanitary building regulations and the new sewage system there should be no trouble.

I would respectfully recommend that the widening of the Nuuanu street be undertaken as soon as the required legal steps will permit. However, in the opinion of many besides the writer, the block is too large even in view of the proposed widening of Chaplain

way clear to take action in both of the above recommendations, I am, Yours very respectfully THEO. RICHARDS,

Hoping that the Board will see its

Inspector Block "19.

## A. S. Cleghorn Beturns.

Hon. A. S. Cleghorn arrived home yesterday on the America Maru from San Francisco. He left Honolulu early in October, intending to go on to Washington on private business, but was taken ill in San Francisco, and spent five weeks in a hospital there. He found it inadvisable to proceed to Washington, but expects to return to the Coast again in the spring, when he will go

SEMI-WEEKLY. 138UED TUESDAYS AND FRIDAYS

WALTER G. SMITH - - EDITOR.

FRIDAY ..... DECEMBER 29, 1399.

THE SHUATION.

The Board of Health, having accept--ed the duty of compelling private property-owners to clean their premises at their own expense, is entitled to the artive support, not only of the public but of the Council of State. It seems to the Advertiser that the time is now at hand for making the desired appropriation of \$100,000 for permanent sanitary works. If no more cases of plague should occur and the quarantime of the port be declared off, then the Council of State would have no the task would devolve upon a Legisreason for doing so the need of erectdemics whether bubonic plague, cholera or yellow fever.

There is also, if the present visitation is to continue, an immediate urgency. The Board of Health says with justice that parts of Chinatown cannot be cleansed either by public or private initiative until certain streets are cut through infected blocks. The money to bear this cost must come, if at all, through the Council of State.

Another great danger to Honolulu and one to which Dr. Wood among others has often recurred, is the use of those reservoirs, is appalling. For years every effort to get an appropriation for filters has been balked-why is neither | South Africa. Visions of Christmas here nor there. The chance is now at | dinners at Pretoria and of the expulhand to secure the money and there is a surplus to draw it from. Why should to some new St. Helena vanished in the not the Council of State take the matter up? Surely it is better to put a big part of the surplus into permanent sanitary values than to run the risk that the United States Government through some hocus pocus, will apply the whole amount on occasion towards the payment of the \$4,000,000 indebtedmess which that Government has as-

## CHANCES OF THE FUTURE.

The possibility that France may war moon England and thus make a Boer triumph certain in South Africa is an interesting study in the light of Amer- | Waterloo or in the Crimea. ican precedent. Will history repeat itself in this respect as it does in so unless Russia and France make up many others?

Close students of the war of the revolution must admit that the Americans might have been borne down but sadly divided, a million of the three sension had followed frequent defeats; the Colonial credit was nearly exhausted: the British blockade was stringent; the army and people were discouraged. Then France stepped in and the situation changed like the transformation scene in a play. Dissension ended, credit came back, the blockade was broken and the army and people took up their burdens with a light heart

Should France step in now the Boers French. They would get, for a year at that would put them in possession of ever been before the country and create, by automatic rica which used to be the dream of the Afrikander Bund. The Boers thempire. If they ever do they will be pressed back to the wilderness Their

Will such intervention come? short time will feel. The French are smarting under the rebuil of Fashoda and the 'insult' of the continued Bratish occupation of Egypt: the army position mapires calmness. Any little thing may inspire war; a b g thing like the bidding of Russia would precipitate foresee that if the mother country is H. And after that, as old King Louis ever ruined our Monroe doctring and said the deluge

## BISHOP ESTATE NUISANCES

The extension of Kukui street from an abuse for which the trustees of the of all her mornies Bishop Estate, which controls the property are responsible. The basic no sanitary restrictions whatever time, will be a menace to the health of the entire neighborhood.

We have heard it said within the past few days by responsible citizens. and we believe it to be true, that the to blame for the filth of Chinatown than any other persons in this place. They control large areas there which are covered by the worst and most squalid tenements, and we can hear of no case, save a very recent one, where they have compelled the occupants to keep the premises clean. Indeed, by a species of rack rent they have discouraged improvements, sanitary and otherwise. And now they are deliberately setting up a fresh nuisance for future Boards of Health to combat. Have these comfortable gentlemen no other thought than the selfish one of dividends? Have they no care for the welfare and safety of the city as a

There has been considerable criticism of the Board of Health and there may be more. But we can tell the Board authority to appropriate anything and how to win enthusiastic applause from every disinterested citizen, and that is lature which may not lawfully sit. So to carry out its present program of the time to appropriate is now and the compelling private property-owners to ing safeguards against any future epi- Bishop Estate nuisances. It would be a cheerful and pregnant omen if the authorities would treat the Bishop Estate as if it did not have a dollar or a friend in the world-treat it with the impartial severity when it insists on maintaining plague spots which might be visited on a pauper Chinese hui. We should then begin to have some hope of the kind of a reform movement the majority of Honolulu people have been aching for these many years.

### GREAT BRITAIN'S CRISIS.

The gravity of the situation in South unfiltered water from the Nuuanu Africa has finally aroused a realizing reservoirs. The fifth which, from one sense in England. There is now no cause or another, finds its way into more talk, such as Mr. Chamberlain and his friends were wont to indulge in, of an "imperial parade" through sion of Presidents Krueger and Steyn battle smoke of Nicholsen's Nek and now the Tugela river rolls between the British army and a fair start into the outskirts of the Boer country. All illusions are gone and Great Britain, having commissioned Lord Roberts and Lord Kitchener to go to South Africa, will give them a command worthy of their dignity and rank and of the formidable task in hand. At last the war with the embattled farmers of the Transvaal is being treated almost as if it were a life and death struggle with some commanding power. Before it is over Great Britain may have a larger force in South Africa than it had at

With such an army it is sure to win their minds that the psychological mo-British power. There is every sign that these allies are watching their for French intervention. They were chance. Russia, balked by Great Britain in the nearer Orient, longs for remillion population being Tories. Dis- venge in the farther East and in India. The ambition of the Czar is to be the primate of Asia. France wants to retrieve Fashoda, to regain lost ground in Egypt, to efface the poignant memory of Waterloo. Against these ambitions Great Britain, in all the panoply of her splendid prestige, has stood almost alone. Suppose that prestige to be overthrown by a handful of Boers, and what may not happen? The hope of some turn of the military tide in South Africa and the world's respecwould surely win, independently of for Britain's splendid navy is now the what the result might be to the Queen's thief reliance. Nevertheless the danger of that supreme trial of least, a pretty clear field of operations strength between England and her between Zambezi and the Cape and ring of enemies is nearer than it has

pontoon trains.

A WORD TO CHINESE.

The Chinese merchants may be acting in good faith, according to the their best to conceal the sick. It is of plague were discovered. Evidently the superstitious Mongols are afraid of cremation, feeling that the spread of the bubonic malady is of small consequence to them beside the preservation of the bones of their dead intact for shipment to China.

In this emergency there are several things which may be done. Chinatown being in an ironbound quarantine all business and inter-commu-trustees and done as they pleased? nication may be inhibited there. To enforce such rules Colonel Jones' regiment of the National Guard, possibly the Regular Army gat Ason, certainly the Citizens' Guard and as a last resort a picked body of Japanese residents may be used. The Japanese are doing their best, with their usual intelligence to abate the plague and from their intimate knowledge of Chinatown they clean up, with special reference to might be of great use in spying out concealed cases. They are not afraid of the Chinese while the Chinese are plainly and for good reasons afraid of them.

We trust that these intimations will be promptly conveyed to the denizens of Chinatown by their local newspaper and by their interpreters. We say Health for the safety of the city they are playing with fire. That is something the white people cannot and will not tolerate. Before submitting to anything of the kind they would apply, throughout the Mongol quarter, the most rigid rules and penarties of maitial law. What martial law would mean to Chinamen who sought to evade it is a question which might be of testamentary interest to their heirs but could not be of prolonged interest, in this world at least, to the offenders

### THE DUTY OF THE HOUR.

The Advertiser's plea for an early meeting of the Council of State and the appropriation of \$100,000 or more to provide Honolulu with permanent works of sanitation met with an affirmative response from the general public. We now await official action which, we are told, will follow a report of Mr. Rowell, the Superintendent of Public Works, upon the cost of providing filters for the Nuugau reservoirs.

Let it be hoped that Mr. Rowell will act speedily so that the crisis which alone legalizes the appropriation of money by the Council of State may not pass before the money is taken out of the surplus. The moment the city is declared free of infection and the quarantine raised, the power of the Council of State to appropriate lapses and nothing can restore it save a recurrence of the plague, the outbreak of war, the presence of invasion or an enabling act by Congress. In default of these everything would have to be referred to a Legislature which may never meet or to a municipality which may deem filters of less importance than paving and the construction of a City Hall.

The time to strike for permanent improvements is now Many are needed beside the reservoir filters. Streets must be widened, alleys cut through certain blocks in Chinatown, property condemned, possibly a Sanitary Police organized. In no other way can Hohoiulu make reasonably sure of escaping future plagues. We have had three visitations of small pox one of which cost hundreds of lives; we have had cholers and now the bubonic plague is here. Nobody knows how soon the yellow fever, a case of which was lately landed in Astoria, may be introduced. It is undispensable that every measure necessary to insurcleanliness, pure drinking water, and the admission of sunshine into damp and dark places, should be taken now If the chance is lost it may not recur for a long time. Alarm is easily allaythis climate. A few weeks from now it may be impossible to get anything

Call the Council of State together as soon as possible. So far as we can learn from careful inquiry the community desires that it should meet and plus as may be necessary to put Hono-

## GOOD RUGES, RAD SMELLS

The trustees of the Bishop Details This he the fact that the leases given

rules and regulations of the health authorities for the time being of the district of Honolulu, and will indemnify Could Not Sleep PLAGUE VIEWS trustees of the Bishop Estate are more promise given Attorney General Coop- against all actions, suits, damages and er, but the common crowd are doing claims by whomsoever brought or made by reason of the non-observance or non-performance of the said rules only by accident that the later cases and regulations and of this covenant.

This is very well indeed-but why these smells? Why the overflowing cesspools under Bishop Estate shacks? Why the circumstance that some of the most annoying problems the sanitary inspectors have had to deal with in the Asiatic quarter are presented on Bishop Estate property? Can it be that the Chincse-Heaven forbid!-have disregarded the careful directions of the

We surmise if cultures were taken of a Bishop Estate cesspool the sanitary directions of the trustees would turn up under the microscope No true Chinaman cares a joss stick for health agreements with the "foreign devil; all he respects is force. And it does not appear that the Bishop Estate trustees have ever invoked the strong arm of the law to enforce their contracts for cleanliness. Were they too mindful of their Chinatown revenues to be particular about a mere smell? Of course not! They were too civil to doubt a Chinaman's word and they did not want to offend him by too much inquisitiveness. That is the

true explanation. The Advertiser, witnessing the care which the trustees evince for the pubto them plainly that in undertaking lic health by means of pledges freely to balk the plans of the Board of given by complaisant Chinamen, makes bold to suggest still another way by which they may win a reputation for sanitary prudence. Why not stop leasing land to the Chinese with the privilege of putting up hovels and dens and go in for model tenements of their own? The trustees of Trinity Church, New York, found it expedient to do that after the calcium light of the press had been turned on their previous methods of business and we are happy to say that they found the scheme profitable. May be it would be the same way with the Bishop Estate. But whether profitable or not such a course would relieve the trustees of a burden of public ill-will which is certain to grow heavier when the people of Honolulu, free under municipal government to make this a model city take it into their heads to summarily abate all nuisances.

## HAWAIIAN STOCKS.

The Examiner of Dec. 21st makes a sensational statement concerning Hawaiian stocks in San Francisco. It begins by putting in parallel columns the values of the stocks as they were, and the values as at present quoted. In the first column we find the highest figures the stocks have been held at during any time of the past year, and in the second column figures, not of any sales that have been made, but those offered for the stocks.

A somewhat lengthy argument is indulged in by the Examiner writer to show that the bottom is dropping out of Hawailan securities. The sole foundation on which the Examiner bases its argument is, that the Cuban crop will be sold for so much next year that it will reduce the price of sugar to 3 and 3½ cents a pound. Any one with knowledge of the Cuban situation knows the sugar plantations there are so demoralized that it will take them a number of years to recover.

It is also a fact that the Hawanian sugar stocks listed on the San Francisco market, have for several months past, been selling on no speculative basis, but on that of a 12 per cent dividend.

Private correspondence received yesterday from San Francisco, states that the fluctuation in Island stocks is due to a bear raid made on the market based on the rise of the English interest rate and the only expectation is, that as soon as the English interest rate fluctuates back to its normal figure, the stocks in question will return to the selling price which they have been quoted at for several months past.

The death of Major General Henry W. Lawton is one of the severe losses which the unfortunate war in the Philippines has visited upon the American army and nation. General Lawton was one of the most dependable soldiers in when they have more money than they the service. ## of Cleanliness Emphasized.

tary Methods Did for a Stricken Community.

Editor Advertiser:-This morning you editorially remarked that "the watchwords of the hour are cleanliness and vigilance. In hoc signo-

The pertinency and truth of your words seem to require but little emphasizing, but, nevertheless, it may not be amiss to call attention to a special and striking instance of the dominant power given over malignant insanitary conditions that, by their tendency to lower the normal status of health and vitality, invite all manner of disease. and not of plague only. Pathogenic: failings, weaknesses or peculiarities of any one, are intensified and oft-times rendered acute by such criminal neglect of all sanitary knowledge and teaching that it at once raises a question of our common sense, of our claims to civilization and our earnestness as men seeking to make the best we can out of the puzzling mysteries and problems of life. The special and striking instance to which I would call attention, and that wonderfully exemplifies how the disgrace of dirt and insanitary conditions form a nidus for disease, occurred in Hongkong in 1894. At a recent meeting of the Sanitary Board of that city the principal civil medical officer stated how, when one district had been giving 100 plague cases a day, 4000 of its inhabitants were moved into new, clean, four-story dwellings, and were compelled to keep these clean and wellaired, and that in the next six weeks, not 100 cases a day but only ten cases of plague, in all, occurred, though the epidemic was raging through the rest of the town."

Anent your annotation regarding rats it may be further stated that, the German Plague Commission, in their report on the plague epidemic in India. after alluding to the long-recognized fact that rats are highly sensitive to plague infection \* \* \* called attention to another fact, namely, that as rats gnaw the dead budies of their kind, the pestilence is very quickly spread among them and carried else-The Samoan agreement gives the where, and ultimately carried to men. spread of the plague.

> It is not, sir, for a layman to speak of medical treatment, but it is perhaps permissible to quote authorities one such, of eminence, says, none of the such measure of success as to highly recommend themselves. What then can be done? Much can be done, even to the suppression and eradication of the dread disease said to be in our midst. A loyal backing up of the powers that be, and an equally loyal and careful attention to their advice

Apropos of these matters allow me Mr. Editor to quote words of one, eminent as a physician and sanitarian the world over. Whiting in the "Asclepiad," Vol. VIII., he says: "We have revolutionized therapeutics, and ever substituting much that is, as yet. so demonstrably scientific as to admit of systematic repetition. We have become animal engineers, and have found that to put foreign elements into our engine is not such good science for keeping the engine in working order. or for preventing it from falling into decay, as prescribing pure air, pure water, pure food, proper rest and amount to \$40,000, a sum which he has proper exercise. ## Collision.

The Waterlogged Carson Being Towed to Port--Statements of Crew -Claudine Uninjured.

The American barkentine William Carson, Captain J. Piltz, from Newcastle with coal for this port, came into night with the Wilders' steamer Claudine, bound for Mani ports, and was abandoned in a sinking condition by her crew five minutes after the disas-

The Carson left Newcastle on No- or property." vember 7th with a cargo of 1,338 tons of coal consigned to H. Hackfeld & Co., and arrived off Koko Head shortly aftthe dangers of approaching the harbor at night, Captain Filtz decided to stand off and on till daylight. When about twelve miles south of Diamond Head the lights of a steamer were observed coming from the direction of Honolulu, and a remark that a tug was approaching was made by one of the crew. No danger was apprehended until the vessel, which turned out to be the Claudine, blew one blast of her whistle, which signified that the steamer's helm had been put over to port, and a couple of minutes later she crashed into the salling vessel, making a huge hole in the latter's starboard bow. The starboard anchor of the sailing vessel fouled with the steamer's rail, and the vessels hung together for two or three minutes, during which part of her crew clambered careened over on her side, and the hull was awash. The Claudine promptly lowered her

boats and took off the balance of the crew of the sinking vessel, and, after standing by her for about an hour she steamed back to port and reported the

Three lady passengers were landed cably. from the steamer, preferring to remain on shore after the shock experi-

enced. The rescued crew and the captain's wife were obliged to leave everything | 000 modern-drilled soldiers under him, behind them in their haste, and as the day had been rather warm, they wore but little clothing when landed. Captain Piltz and wife went at once to the Arlington Hotel, while the men were looked after at the police station.

## The Eleu Goes Out.

Early resterday morning the Eleu, with Captain Piltz on board, proceeded to the seene of the disaster, for the purpose of discovering if the Carson had actually disappeared below the water, and at about 11:45 the vessel was discovered floating on her starboard side, with her port bilge awash, masts in the water and yards upright After many unsuccessful attempts,

the Eleu at about 1.30 p. m. passed a strong hawser with wire pennant through a chock on her port quarter. and one of her crew having dived and passed the eye over one of the bits on the poop, she commenced to tow the wreck stern first in the direction of the harbor. The Lehua, which had in the meantime arrived on the scene passed another line, which was made fast to the Eleu.

The Iroquois passed an 8-inch mantla hawser to the Eleu, having been unable to secure a hold on the waterlogged ship, but the enormous strain on the smaller vessel became too much off but left with the Eleu, and the Iroquois returned to port, arriving at about 7:30 last night. When she left the two vessels towing at about 5.40 p. m. they were about five miles southeast of Diamond Head and had moved the Carson about six miles toward; port. The combined power of the two tugs is bringing her along at less than a mile an hour, and it is probable that they will reach the entrance to the channel about daylight.

The starboard anchor of the Carson is hanging loose, and before she can be brought into port it will be necessary to remove this and also her masts; and even then it is possible that her depth will not allow her safe passage through the channel.

## History of the Vessel.

The William Carson is quite a new launched at Eureka, Cai., on June 3d. sired puni-ament. She took a lumber cargo from Port | The session was eventually suspend-Blakely to Sydney, and from there ed and the court retired to consider she filled up with coal and sailed for claimed M. months ago. When seen resterday afternoon the Arlington Hotel, Mrs. Piltz was thoroughly unnerved, but stated "that the ressel's lights were burning brightly and the captain and myself were seated on the poop; the second mate being on deck and in charge of the versel. For over an hour we had seen the steamer's light, but thought the men on board knew their business and would pass astern of us, but when she was right upon us, one blast from her boarg interpreted as disloral. whistle was followed by a change in

with all on board. As it was, five minutes after the crash, the ship was lying with her yards in the water, and my bushand had barely time to pass a rope around my waist and transfer me to the steamer before our ship was lying on her side and appeared to be Claudine and Carson in about to sink altogether. The steamer man said he was very sorry, but he mistook var starboard light for the headlight of a steamer; but I don't know how he could do so, as the cabin lights were very bright and showed through the open skylights clearly. We have lost everything we had, and the pour sailors are in the same condition."

### Statements of Officers and Crew.

Captain Piltz said he "could give no explanation for the disaster. The Carson's lights were burning brightly and the lookout on the steamer must have been blind.'

Mate Harrison said he "was below at collision at about 3:30 on Wednesday the time of the collision and do not is furnished through the courtesy of know how the disaster occurred. We were making about five knots, standing off shore at the time. I heard the steamer whistle, which was given about a minute or so before the crash, and I had just time to get on deck without saving any of my instruments

The man at the Carson's wheel said he "thought the steamer was a tug, as she made straight for us. I saw her lights for a long time before the coler dark on last Wednesday. Knowing lision, and believe that she would have passed astern of us if she had not ported her belm. The Carson remained for an hour on her beam ends and then

the steamer brought us on to port." A careful examination of the Claudine was made, but as no damage was discovered she resumed her voyage to Maui. No statements were made by the people in charge of the Claudine, which, owing to the illness of Captain Cameron, was in command of First Mate Weisbarth.

## BATTLE AT KUANGCHOU.

Grave Trouble Between the French and Chinese.

TACOMA, Dec. 17.—Oriental advices state that the French-Chinese boundary dispute at Kwongchouwan, on over the bows of the steamer. Five Kuangchou Bay, has resulted in bloodminutes after the collision the Carson shed. Marshal Su's arrival there last month was signalized by a lively preiminary fight between French and Chinese troops. From French sources it is learned:that the French had six wounded, while several Chinese were killed and sixty wounded. Both sides are preparing for war, though it is hoped the dispute will be settled ami-

> Marshal Su is the most famous Chiese general living and the victor of the battle of Lianshan in the last Franco-Chinese war. He has a force of 30,and was sent to Kuangchou Bay with express orders from the Empress Dowager to protect China's rights with force if necessary, and without further instructions from Peking. At Tsekhan, near by, he has a reserve force of 6,000 regulars. The French force is much smaller, but it has as-sembled the following six warships in the bay to assist the troops, if necessary : Descartes, Benagli, Pascal, Surprise, Lion and Dentrecasteaux.

> The Chinese war spirit has been aroused by Paris cablegrams announcing that President Loubet has refused to receive Yu Keng, the new Chinese Minister to France, pending the set-tlement of the boundary difficulties.

> Kuangchou Bay is on the Tonquin border and was demanded by the French last summer. China complied, but when the time came to delimit French "leased" territory France increased her demands threefold.

## DEROULEDE IN JAIL.

### The Monarchist Leader Goes to Jail for Two Years.

PARIS, Dec. 20.-In the Senate, sitting as a High Court of Justice today, counsel urged that the charges against for her safety, and the line was cast M. Marcel-Habert be joined to the present proceedings, but the Prosecutor-General declared this would be illegal. M. Deroulede, President of the I eague of Patrious, who, though ill, was present, virulently denounced the of raws there is no question that buy-Senators and law officers for being ers of refined should buy freely enough subservient to the Government's ord- now to have on hand constantly a fair ers. Amidst immense uproar, M. De- line of stock. It seems perfectly safe roulede added:

> assemblage is infamous and dishonors are also advisable because of the ex-France and the republic."

During the increasing din, M. Deroulede continued: "I include in my lored was advanced 1-16c.
denunciations both the Senate and the In regard to the raw st President of the republic."

The Procurator, with difficulty, made himself heard in the tumuk which en- had there been any sugar in the market sued, and demanded the prompt pun-ishment of M. Deroulede, who contin-ued to hurl insults at the High Court, offerings the market finally recovered wooden vessel of 791 tons, having been coupled with the assertion that he de-

sailed in ballast to Newcastle, where the situation, while the prisoners ac-

Upon the resumption of the proceedful storm was encountered and one of judgment, condemning M. Deroulede to story not over 10,000 tons. Other West her crew washed overboard and lost, two years' imprisonment and ordering. India crops are not yet available, and the Carson is owned by a company, his exclusion from the court until the captain having an interest and arguments of counsel and commenced; when available. The scarcity of cane also refusing to include the charges supplies for some time to come has against M. Marcel-Habert in the trial. On November 18 M. Deroulede was

## Anti-British Colonists.

CAPE TOWN, Dec 16-Five hundred colonists of the Victoria West District have perfected an apparently anti-British organization there and have openly expressed disloyalty, and for the plantation are of a very satishave threatened to attack the railroad factory character. The crop now be station, which is on the direct line be- ing cut and milled will amount t tween Cape Town and De Aar. The about 19 000 tone which is about 3 0. Afrikanderbundites, at a meeting there, tons more than last year's crop. T' proclaimed its lovaliv, but declared that the conduct of the troops forced the people to commit acts capable of

her course, which threw her completely. In the building formerly occupied by over our bows and she struck us with Henry May & Co and now demolished over our bows and she struck us with Henry May & Co and now demolished arations are being made to get a crop fearful force. It is a mercy she did the uprtairs rooms were used for many of from 50,600 to 70,600 tons two years not strike amidships, or our vessel years by Excelsion Lodge No 1, I O. from now. And that will be the year-would have gone down like a stone to F in the carly fifties. would have gone down like a stone O. F. in the early fifties

Financial Markets of Europe Affected by British Reverses--Scarcity of Cane Sugar Supplies.

The following correspondence, dated December 21st, relative to the sugar markets of the Mainland and Europe, Messrs. Schaefer & Co.:

### From Williams, Dimond & Co.

SUGAR-We last addressed you by circular per steamer Australia, December 12; since which the local market and prices for export to Honolulu have remained unchanged.

BASIS-No sales reported until December 15, to arrive sale 500 tons at 14c. Quotations unchanged, and only sale reported since December 20, 600 tons at 44c, making net basis for Island sugars in New York 41/4c; San

Francisco 3% on that date.

LONDON BEETS—12th, 9s 2¼d;
13th, 9s 1½d; 14th to 16th, 9s 2¼d;
18th to 20th, 9s 1½d.

DRY GRANULATED unchanged, with only a moderate demand. EASTERN AND FOREIGN MAR-KETS-The news of British reverses affected the beet sugar market and financial markets of Europe unfavorably, in sympathy with which sales of sugar in the New York market are somewhat restricted, and a cargo of Javas, which arrived, had to go into store, but we note by telegraphic advices received vesterday that sales to arrive had been made in New York

STATISTICAL POSITION-Dec. 14 total stock U S.: Four ports estimated 13th inst., 210,433 tons, against 87,647 tons same date last year. Cuba, six principal ports, Dec. 13, 11,000 tons, against 8,107 tons same date last year. same unever dates last year.

## From Willett & Gray.

Statistics from Willett & Gray's latest circular just received are as fol-

Official statement of the Hawaiian sugar crop from October 1, 1898, to September 30, 1899, as compared with the two preceding seasons follows

| 1 p. cc    | ourse, see | DOME TOTA | 0 47 15  |
|------------|------------|-----------|----------|
|            | 1898-99.   | 1897-98.  | 1896-97. |
| Hawaii     | .104 678   | 81,771    | 113,156  |
| Maui       | . 48,561   | 40.208    | 36,649   |
| Oahu       | . 40,911   | 30 519    | 25.829   |
| Kanai      | 58,356     | 52,316    | 48,584   |
|            |            |           |          |
| Total tons | . 252,506  | 204,814   | 224,218  |

In regard to the statistical position of the sugar market, Willett & Gray, December 7, said: Stocks in Europe, 589,000 tons, against 556,000 tons last week, and 656.699 tons last year. Total stocks of Europe and America 809,897 tons, against 767,568 tons last week, and 752,926 tons last year at the same uneven dates, and 732,059 tons, at even date of Oct. 1st. last year. The excess of stock is 56,971 tons, against an excess of 33,520 tons last week, and a deficiency of 102,311 tons, Dec. 29, 1898. In regard to the refined sugar mar-

ket, Willett & Gray, Dec. 7, said: The last month of the year brings out some new features to the refined sugar market, not altogether clear for future guidance All refiners except Doscher stopped the shading of prices of soft sugars, and this caused much increase in withdrawals under old contracts. All refiners decline to sell for delivery next year. This may mean something or nothing, but is probably giving the National Wholesale Grocers Association a chance to perfect some plan for the better handling of refined by the grocers. Considering the stanle nature of the raw market and the fact that refined is within 1/2c per bound to do so independent of any contingen-"I wish to be condemned. I will say cles that might arise near the new what I think of these scoundrels. This year. Shipments during this month pected advance in railroad freights aft-

" January 1st. New Orleans granu-In regard to the raw sugar market, Willett & Gray, Dec. 7, said:

During the larger part of the week, its lost firmness of last week and closes with sales of Demeraras for shipment at 2 9-16c c. i. f.; also a steamer cargo of Javas about due at 11s 7¼d c i f, both equal to 4¼c basis for 96 degree tost. Centrifugals. The amount of Demerara crop sugars beet sugars, and the outlook is for continued steadiners to the raw sugar

## Note and Comment

The following is from the Financia Letter of San Francisco: The directors of the Hawaiian me on the 13th inst. and declared a divi dend of 50 cents per share, payabl on the 20th Inst. The latest report cane for the next campaign, which now in and growing, and which looks remarkably well, will yield about 25 000

tons. At this time next year this crop will be ready for the mill Mr. Lourie. the superintendent writes that the cane is in the best condition. All preply output thereafter,

Due to Climate.

The weather is often very trying. The blood becomes filled with impurities and the nervous system is greatly weakened. One awakens in the morn-ing just as tired as at night.

Mr. John Dryden of Coolgardie, W.A., sends with his portrait the following

"I go about the country a great deal and have to encounter very trying weather. When my system is run down by the peculiar de-pressing climate of ours I always take

at once and builds up my system in every way As a blood purifier and nerve tonic I believe it to be the best medicine in the world."

To get the best results from Ayer's Sarsaparilla you should take Ayer's Pills also. They cure constipation, biliousness, sick headache, and dys-Frepared by Br. J. C. Ayer & Co., Lowell, Mass., U.S.A.

HOLLISTER DRUG CO., Agents.

Hawaiian, which sold in small lots at 92½ at the opening of the week, advanced to 95 at the close. That price is now bid for it and 100 is asked.

The rain on the Paauhau and Ho-nokaa has been unprecedentedly large this season. These two plantations Total stocks, Europe and America, 1. are in the most satisfactory physical 098,435 tons, against 1,013.789 tons condition. Indeed it is reported by condition. Indeed it is reported by experts that these two plantations are in a better state now than at any other time in their hstory. The crops now being harvested insure dividends for twelve months to come, and the rains already had by the plantations insure the present growing crops, which makes dividends for twelve months more certain. So that these plantations have almost two years' dividends in sight. It would be difficult to point out a safer investment.
Pasuhau opened at 31% and sold

## LOCAL BREVITIES.

## Chinatown Under Guard.

First Regiment Called Out After Midnight--Scenes and Incidents of the Scare.

(From Thursday's Daily.)

An autopsy was performed last night on the Chinese young man who was found dead at the gateway of the Chinese hospital. His was a suspicious case, and the postmortem developed the symptoms of bubonic plague which have been observed in all the previous fatal cases with a more pronounced showing in the axillary gland of the right side. Here the gland was badly swollen and a bubo of considerable size was cut out and preserved for bacteriological examination. The left inguinal gland was also swollen, and both were filled with the same bloody serum which was discovered in the other cases. The heart was filled with fluid not yet clotted, and the abdominal cavity contained serum. No official statement coming directly from the Board of Health has been issued that the man came to his death from bubonic plague, but the announcement will probably come from the Board today. Prominent physicians who were present at the autopsy certain of the cause of death as above stated.

agents of the Board of Health were kept busy responding to calls to examine cases of sickness in every part of the city. Considerable opposition on the part of the Chinese is being met with in spite of the promise made on Tuesday by the Chinese Consul and merchants that they would do everything in their power to assist the Board of Health.

In cases of sickness the Chinese failed to report to the Health Office and smuggled the patients from one section to another. In one room in Chinatown which had been visited by the inspectors very often was found a sick Chinaman who had been kept in hiding for several days. The Chinese seem to quarantine will he placed around them (that sounds very facetious). and they immediately devise plans to get rid of the patient.

Chinese continue concealment as be-fore, much to the exasperation of Pres-

Dr Mitamura yesterday evening 1eported a sick Japanese in a building near the corner of Smith and Pauahi streets called Kobayashi's hotel, After Dr Mitamura said he considered it a the best on the Islands serious case and asked that the Board remove the patient to the Kakaako isodation and also has quarantined the

The only death reported during the hospital with the evident intent of avoiding the Board of Health inspectwent out at the request of a Chinese physician and found the body of a young Chinaman in the lane just outside the gates. They were told that the man had come out during the afternoon saving he was sick and had applied for admission to the hospital which had been refused. The Chinaman lay down just at the yard entrance and died shortly after.

a reporter of the Advertiser went ouwithin the gates covered with a blanket. He was a young man scarcely twenty years of age and evidently a worker in a shop. The reporter learn ed later that the man had been brought to the hospital in an express wagon and came from a store on Nuuauu street facing Paushi street.

At 8 o'clock last evening a back

drove up to the Health office Glowed by some native boys. The back he'd a Ohinaman who was said to be sick just as be was about to be placed in mais he among I can not understand. another back. The natives around there objected to the Chinaman's removel as they feared a quarantine The hackman became frightened and drove away hurriedly. The sick man could not stand and lay on the side walk. The natives called a second back and brought the patient and a Chinaman who had been assisting him to the Health office Doctor Garvin upon examination found that the man were sufficient to have the man sent! to Kakaako as his temperature regrethat his brother is Chong Song Say, who R. keeps a store on Maunakea street, from where the sick Chinaman probably came. He is not expected to live until this morning.

Minister Mott-Smith has sent by the America Maru official communications to the Hawaiian Sanitary Inspectors at Yokohama and dong long, notifying them of the prevalence of the plague A Bark Well Known in 197 feet 9 inches long, 38 feet 8 inches beam and 24 feet 2 inches deep. them of the prevalence of the plague here, and that Honolulu is at present an infected port.

Judge Carter has appointed as his assistants for examining the Chinese and Japanese houses between Walkik' and Kalihi, the following gentlemen: J. O. Carter, Jr., H. M. Mott-Smith, C. H. Parker, P. 1. Phillips, James Spencer, W. J. Coelho, F. T. P. Waterhouse, A. L. C. Atkinson, John Mitchell, J. O. Young, W. R. Castle, A. V. Gear, George Waterhouse, P. M. Lansdale, W. M. King, Allan Judd.

## The Ancient Capital is Not Declining.

Comments on Population and Development--Calls Local Scribe to Account for Errors.

Editor Advertiser:-In the "Weekly Star" of December 12th appears an editorial entitled "A Change Desirable," wherein the writer seems anxious to have both court terms of the S.cond Circuit held in Wailuku. The writer is open to considerable criticism for this. He first refers to Kaanapa i as a sparsely settled district—in the next few lines he speaks of Honokowai and Olowalu as two small districts He next says, "the matter is more easily understood if anyone will study the map of the Island and the population All day yesterday the physicians and figures according to the last census."

It does not appear to me as though the writer of that article had ever studied the map of Mani to any great extent. When he refers to Kaanapali, Honokowai and Olowalu as districts his ignorance of the political divisions of the Island of Maul becomes apparent, for there is only one district on tne west side of Mani, and that is the Lahaina district

He tries to impress his readers with his knowledge of what Lahaina was away back in the fifties He says towns or villages have their period of dethink that if a case of sickness is found velopment as all other human affairs, in their house or place of business the Lahaina budded, flowered and faded

Where he got his census figures from Considerable opposition toward the I do not know but I know there is Chipese Consul and Vice Consul has close on 2,000 ablebodied men employbeen manifested for several days, and ed by the Pioneer Mill Co alone that bark dangerously near Bonilla. She despite the advice of the Consul the would leave three to 400 men, was heading about west, but the wind women and children in other parts of the house returned to the ident Conner and the Board of Health the district according to his figures, bark they had reported, that a breeze 2,398 last census, and here I mean to sprung up off shore which enabled her

Point Lighthouse-Captain and Crew Lost.

VICTORIA, Dec. 17 .-- A letter rewhich he was unable to learn, and her which feed it. subsequent release. At the same time berti, comes forward with a story brought to him by the Dodge Cave Indians, which goes to prove that the bark seen on the Point, which was none other than the overdue Colusa, afterward foundered. The Indians watched the waters cover her.

That the Colusa has gone down and that Captain Ewarts, his wife and the crew have gone down to a sailor's grave in the waters they have sailed so long seems to be a certainty. Many have surmised that the bark was lost, but the surmises have been based on nothing more than the fact that she was so long overdue, coupled with that of her unseaworthy condition, she not having been repaired properly after the accident she sustained when entering Kahului on her last trip from San Francisco. The letter received from the lighthouse keeper, who has been unable to get word here for some time past owing to the collapse of the telegraph wire, was as follows:

"On the morning of the 18th two of my boys heard some rifle shots. Thinking it was some one signaling to them, they returned toward Bonilla Point. On the same rock that the Duchess of Argyle struck they saw a bark, the identity of which they could not ascertain. There was a thick fog, with light, baffling winds, heavy rain and seen she was lying over considerably; her anchor was down, but her stern, as she swung, caught on the rock. A big sea struck her and she swung clear and straightened up to her anchor I felt languid and heavy, as if somewith her head out to sea, but her stern thing had come over me. I had a bad well in the small bay at the Chusapis taste in the mouth, my appetite was waterfall, between and within a few yards of the wrecks of the Duchess of

Argyle and the Puritan. "The boys, being unable to cross the about two miles east of Bonilla, where they could open the wire, and then tapped with the ends of the wire, calling me, and said there was a vessel on shore at Bonilla. There being no Indians here I telephoned to Cloose to my eldest son to come up at once and bring assistance, which he did. At 1 a m. the fog cleared, when I saw a to get clear, but they think she was badly damaged and shipped her cable

was on his way down he heard of the the bark, which from the description Six years ago Lahaina boasted of given must have been the same one seen ashore on Bonilla Point, was carand went down rapidly as though her bottom had fallen out or her seams narted. This was about the beginning told the prospector the same story of the foundering of the vessel and he says he has every reason to believe the report is true. Since the Indians told the prospector of the disaster they have gone to the big potlatch now in progress at Esperanza Inlet, which is attracting the Siwashes from up and down the coast, and they have not rethe local customs An effort will, however, be made to reach them and get their report

After the vessel went down they watched for boats but saw none Then they searched the beach and rocks for of his studies in connection with it. wreckage without avail Not a mon or He considers that an international vestige of anything from the wreck seems to have reached the short Of iv that the lost vessel is the Colusa, to calla Maglinia, would prove invalubut everything seems to point to that ab for the successful development of having been the case.

Has Been in Hard Luck.

The Colusa is well known in the San Francisco trade having been owned there for nearly a generation. In 1889 she was one of the smartest command of Captain Backus The captain has not been in the vessel for many years but slwavs retained his nterest in her and is now one of the SON OF AN OHIO MERCHANT principal sufferers by the loss of the result In those days G F Smith & Co were the managing owner lut during the last few years A. H. Paul

The Colusa left San Prancisco Sept 6 then overdue fleet se'd. The o'd Co- a tunnel terminus in its territory

lusa is out thirty-nine days from Kahului for Departure Bay, and she is the vessel for which the gravest auxiety is felt, as she was ashore on the Island of Hawaii and was on her way to the Sound in ballast for repairs."

The Colusa was built in Bath, Me.,

THE GLORY OF MAN.

The crown and glory of manhood She Strikes Near the Carmanah strength-power. All human conquests have been won by it; individual and collective. The earliest sign of decay in man is not usually pain, but weakness of some kind-of mind or body, or both. This may be the inevitable sequence of advanced years, or it may, as we all know, show itself at any period ceived here today from Lighthouse of life. But it always means that the Keeper W. P. Daykin, who is stationed sources of strength are failing, as the at Carmanah Point, gives news of the lessening of the water in a river means stranding of a bark, the identity of a drying up of the springs and streams

I said "sources" of strength, using the plural word. I should have said Asa Drinkwater, a prospector of Al- "source" of strength, for in human beings there is but one. What is it? Perhaps the experience of Mr. David Jones will help us to an answer.

"In the summer of 1881," he says, "I began to feel ill and out of sorts. I was weak and tired, and quite worn out with little exertion. I had a poor appetite, and after eating had pain and weight at the chest. My secretions were scanty and thick. My back felt stiff, and gave me much pain as I moved about. For three years I suffered like this, being at times better and then worse. I consulted a doctor, who gave me medicines and recommended Turkish baths; but I got no better for

any kind of treatment. "My brother then told me about Mother Seigel's Curative Syrup, but I had no faith in advertised medicines He, however, urged me to take it, and after taking a few doses I experienced so much relief that I continued with it, and was soon strong and well as ever. Since that time I take a dose of this remedy when I feel at all oiling, and it sets me right. I have praised Mother Seigel's Syrup to all my friends many of whom have tried it and been benefited by it. You can publish this File Fund and Restatement as you like (Signed) David serve for Uncollect-Jones, 1, Dunluce Street, Walton, Liverpool./July 31st, 1896."

We have room for one more short letter before we try to come at the answer to the question with which we a heavy surf on the beach. When first set out. It is exactly in the same line, and ought to make the results of our inquiry all the more clear and plain.

"In the spring of 1888," proceeds the writer, "my health began to fail me. poor, and the little food I took gave me pain across the chest and between the shoulders. My food lay like lead on my stomach I was constantly river to get home, ran down to Klide, spitting up a thick phlegm, and when in bed heary sweats came over me I got weaker and weaker, and from time to time was confined to bed Often I was so bad I could not dress or undress myself.

"Now better, now worse, but never well, I suffered for over five years took different kinds of medicines, and had a doctor, but got no real benefit from anything.

"In July, 1893, a book was left at my ouse in which mine having been cured by Mother Seigel's Syrup. I got a bottle from the International Tea Company, Yeovil, and began taking it In a short time It was a miracle that she ever got clear, I telt much benefit, and, by continuing better, food agreed with me, and byand-by I was strong and well But for liberty to publish this statement. (Signed) (Mrs.) Jane Crouch, 82, Huish, Yeovil, November 29th, 1895."

What then, do these cases show to be the source of strength? The answer is, Otpested Food. That and nothing else. All strength, of body or of mind, comes from that, and that only. What then, is the great shemy of strength the fountain of weakness? Indigestion -dyspepsia, You see why and how A child could not entsay the argument What, then, restores strength? Mother Seigel's Syrup. In what way? By setting the digestive machinery in healthy operation. That is what it did for our correspondents and does daily for multitudes. Use it if you need it, and pass the news to other weak once

TO TUNNEL GIBRALTAR.

Gigantic Undertaking Proposed by a French Engineer.

PARIS, Dec 15 -A gigantic undertaking for tunneling the Straits of Gibraltar is receiving attention now. M. Jean Berlier, a famous civil engineer, who is the author of the project, has jus published in book from the result tunnel, uniting Spain and Morocco and prolonged by a railway from Tangiers (France's African colonies.

From coundings taken by him M.
Ber'er has proved the existence of a
compact rock formation across the
ciral a which guarantees solidity and importmentility. The undertaking, he says would be no more difficult than the riercing of Mont Cenis, St. Gothard Arlberg or Simplen He adds that if diplomatic obstacles are not greater than the natural ones, success

## BRITISH WAR SPIRIT IS FLAMING HIGH.

(Continued from Page 2.)

bills today in the Senate authorizing the appointment of commissioners to investigate trade conditions in the Orient. The commission in each case is to consist of five members. Senator Gallinger's bill provides for one commissioner from the Eastern States, one from the Middle States, one from the Southern States, one from the Western States and one from the Pacific Coast States. Senator Foster's bill of the Tugela river. provides for two commissioners from the Atlantic Coast States, two from the Pacific Coast States and one from

the Middle West. Senator McMillan introduced a bill for the construction of a Pacific cable from San Francisco to Hawaii, Guam and the Philippines, the route to be decided by a commission; Senator Foster a bill to authorize the leasing of lands west of the ninety-ninth meridian for grazing purposes.

### DANGER TO THE CABLE.

Matters Are Now Complicated By a Spanish Grant.

WASHINGTON, Dec. 17. - The cable monopoly, for which Spain is at a discount of 10 per cent. responsible. Spain granted a conces. A Sun cable from Manila December sion to the Eastern Extension Cable them with other countries.

Company will be to cause that corpor- months ago near Baler. ation to protest against the violation of its rights by the United States, which proposes to run a line from a point on the California coast to Luzon, via the Hawailan, Midway or Wake Islands, and to establish international and governmental cable communication with Japan, between the Islands of Luzon and Formosa, and with Chisome commercially desirable Chinese ern Extension Company's concession als, \$2.25; sergeants, \$2.50; first serand materially reduce its business, now geants, \$2.75; second lieutenants, \$3.77; ters in which no Europeans live.

in the matter of the concession held by the Western Union, this Government, under the terms of the treaty of peace, will be required to respect the rights possessed by the Eastern Extension Company. This is apparently the opinion of Major R. H. Thompson, who was chief signal officer of the army of the Philippines, whose annual the report of Brigadie: Ceneral Greely, chief signal office...

The Hougkong cable," Major Thompson states, "formerly terminated at Bolinao, but under the Spanish authorization of March 30, 1898, it was extended to Manila. A Spanish decree granting this extension also appears to concede the monopoly of cable privileges between Hongkong to the cable company until the year 1940, and, what is of still greater present moment, the decree gives the company the exclusive landing rights for a long term of years for all cables joining the several islands or connecting them with other countries.

"The only escape from this monopoly seems to lie in the redemption of the privileges by purchase, which is each remaining year of the concession. The Spanish Government, however, reserved to public service the right of inter-island communication, and it thus happens that the army is unhampered in the use of its cables for military purposes."

In order to prevent endless litigation. therefore, it is evident that the United States must pay the Eastern Extension Company nearly \$1,000,000 to purchase its privileges.

## NICARAGUA CANAL.

The Bill for its Construction May Yet be Passed.

NEW YORK, Dec. 17.—The Journal has the following from Washington: News has been received in Washington that the concession of the Nicaraguan Government to the Cragin-Eyre-Grace Syndicate is to be canceled and that the Nicaraguan Government intends to extend the life of the Maritime Canal Company. The United States Government has made representations to the Nicaraguan Government that this extension should be granted. When this is done it will permit a continuance of the plan suggested in Senator Morgan's bill in the last Congress for the con-struction of the canal by the United States through the fastrumentality of the Maritime Canal Corporation.

An effort will be made during this Congress to put through the bill, pas-

A prominent member of the commitee was assured this week by the State Department that no obstacles would be interposed by the Micaraguan Government to prosecution of work under the Maritime Canal Company's concession. The President said to the same Senator that it was his ambition to see this great work thoroughly initiated during his administration.

## NEWS CONDENSED.

Buller's army has been moved back five miles.

The German flag has been hoisted over Apia.

Dewey's flag lieutenant, T. M. Brumby, is dead. Agninatio is still reported to be

fleeing in disguise. General Buller was frequently under

fire during the recent battle. Every ship in the British navy is be-

ing prepared for an emergency. Several seasoned regiments will be Co., Ltd., agents for H. L.

House and Water Regulations that Preserve People of an Equatorial Port from Epidemics.

Editor Advertiser: At a time when he subject of sanitation is prominently before the people of Honolulu, it may be of general interest to hear how troubles of the kind we have just experienced are dealt with elsewhere.

The city of Singapore is situated at the equator. Its mean annual temperature is about 80 degrees Fahrenheit; the trade-winds, that are so pleasant and wholesome a feature of our Hawaiian climate, are light and infrequent, while the relative humidity of alluvial plain, intersected by tidal creeks and marshes, and diversified by dykes of granite and laterite.

The population of Singapore is (or was, when I resided there, some few years since) made up of about 150,000 Asiatics and 6,000 Europeans. Of the Asiatics the Chinese constitute the major past; then follow the Indians, Malays, Japanese and others. The 6,000 whites include the British garrison of some 3,500 men.

The commercial interests of Singapore are vastly greater than those of Hawaii. The docks, aggregating over three miles in length, are thronged with shipping. Communication with Asia, Europe and Australia is constant. Fleets of junks ply between Singapore and all the southern Chinese ports. The volume of Asiatic travel is great and unrestricted, save by health regulations.

Cholera, plague, typhoid and smallpox are constantly present in the city: yet an epidemic of any of these diseases

### Singapore is Fxempt.

From this brief description it will be seen that the liability of Singapore to epidemics is much greater than that of Honolulu. Yet for many years Singapore has been free from epidemics of the deadly diseases. This immunity is to be ascribed, first, to the excellence of the water supply: and, secondw to the etainment remulations regard. ing the crection of dwellings.

The water supply is derived from an artificial lake some miles out of the city. This lake receives the drainage from the rainfall on an area constituting a Government reservation. On this reservation no one is permitted to live; and the entire area is enclosed by a cemented drain, insuring that no cial deposit balance of \$24,500 was held drainage from outside finds its way into the reservoir. From the impoundng reservoir the water is conveyed gravity to the filter-beds, which are in duplicate, assuring an uninterrupted supply of filtered water. From the filter-beds the water is pumped to the distributing reservoir, where it is thoroughly aerated before passing into

the city mains. No building can be erected in Singapore without a permit from the Buildings Inspector. This permit, for which hall. In the evening at 8 o'clock, the suitability of site and conformity of proposed building to municipal regu-

made impervious to water. The floor cannot be elevated above the ground. but the surface of the ground may be raised to any desired hight. A coment drain, so laid as to receive all the drainage from the house, must be built to connect with the nearest sewer; thus it is impossible for the soil to become saturated with filth from the

There are no cesspools. All closets e furnished with gaivanized iron pails to receive the defecations. Each norning these pails are removed, toether with their contents, and reaced by clean ones. All the night soil is used as fertilizer by the Chinese planters and gardeners adjacent to the ity. An incinerating plant disposes of the garbage.

### Construction of Buildings. No wooden buildings are permitted

within the fire limits. No room can be smaller than a certain specified size. Tenements are divided into apartments by solid brick walls rising from ground to roof, and each apartment has but one street. No back doors or secret underground passages are possible. The inmates cannot avoid the police. The roofs being of tile, fire could hardly be communicated from one house to another, or even from one apartment of a tenement to another apartment in the same building. No matter how filthy an apartment might be, half an hour's use of a fire hose and a pail of whitewash would suffice to restore it to a perfectly sanitary condition.

Contrast these conditions with the infection than Honoiulu.

Hives are a terrible tormen; to the Donne's Olutment never fatts. Instant relief and permanent cure. Athomist's 50 cents.

Only the best red rubber stamps at the Gazette office.

FOR RED ROUGH **HANDS** 

ITCHING BURNING **PALMS** 

One Night Treatment. Soak the hands on retiring in a strong, hot, creamy lather of CUTICURA SOAP. Dry, and anoint freely with CUTICURA, the great skin cure and purest of emollients. Wear, during the night, old, loose kid gloves, with the finger ends cut off and air holes cut in the palms. For red, rough, chapped hands, dry, fissured, itching, feverish palms, with shapeless nails and painful finger ends, this treatment is simply wonderful.

HOW TO CURE TORTURING, DISFIGURING HUMORS.

Bathe the affected parts with Hor WAYER and CUTICURA SOAP, to remove the crusts and scales, and soften the inflamed, cracked, bleeding, or thickened cuticle. Next apply CUTICURA Ointment, the great skin cure and purest of emollients, to allay itching, irrita tion, and inflammation, and soothe and heal. Lastly, take a full dose of CUTICURA RESOLVENT, to cool and cleanse the blood, and expel HUMON GERMS.

This single treatment affords instant relief, permits rest and sleep, and points to a speedy, permanent, and economical cure of the most torturing, disfiguring, in hing, burning, and scalp skin and scalp humors, rashes, and irritations, with loss of hair, when all other remedies, and even the best physicians fail.

## Not Stop.

W. Caldbeck, H. M. Loud, C. F. Scholl, Fumigating Algoa's Cargo -- Coal Snip Jabez Howes In--Island Steamers Sail.

> Piled high on the Esplanade alongside of the Pacific Mail Company's warehouse in last night's driving rain goa. In a hot, sulphurous room adjoining with air fans forcing fumes not enjoyed a wink of sleep owing to | nett. a continual demand for his services for the past forty-eight hours. Tired with continual watching over the Asiatic freight, for the proper disinfection of which he alone is responsible, he has continually kept the fires going under the roasting squares of chemicals. From them blue flames danced up, filling the room with suffocating air. Longshoremen were busy out in the pattering rainfall trying to shield the valuable freight with tarpaulins, while the drays were hauling it to the mauka end of the Fishmarket, where it is to remain until it can be delivered to the unfortunate Chinese consignees, whose stores are now quarantined. During the morning the plague-stricken front had another reminder of a previous experience during the cholera epidemic years ago. For all remembered how the Alameda, from Sydney for San Francisco, steamed away without mail or passengers when she heard of that dread disease in Honolulu. And so the Grant, the big United States army transport, with the Forty-eighth Infantry from San Francisco for Manila, composed of colored soldiers, left without delay when the word plague was passed to her by the pilot. All that was left as a memento was a package of official documents from the War Department marked "Important," which was flung to United States Quartermaster Ruhlen, who went out especially to secure the landing of some forty tons of stores for the depot commissary and which was greatly needed at this post. Off the Grant sailed. Over the rail grinned the dark-skinned soidiers. On the decks could be seen the men gathered in groups shooting craps, dancing jigs and singing songs to ban-10 accompaniments. The soldiers were in the best of spirits and the merriment was boisterous on board, notwithstanding the siege of quarantine on Angel Island, which they had under-The ship Jabez Howes was sighted off Diamond Head late in the afternoon and will come into the harbor this morning. The Mauna Loa, from Kona and Kau ports, is also due tóday, and will resume her regular schedule next
